

NATINA[®]

STEEL SOLUTION

Project Name: Florida Drive
Median Barrier

Materials applied with Natina: All
galvanized parts including guardrail,
light poles and hardware

When guardrail complements the roadways

Together we worked with the City of San Diego and Caltrans (California Department of Transportation) on the Florida Drive Median Barrier Project to patina guardrails and light poles in March 2015. Natina was specified because of its long-lasting, rustic brown finish. In fact, Caltrans included Natina in their original specification as part of their visual impact assessment needs. Additionally, the city specified Natina because there is little to no maintenance needed. Natina utilizes nature's color technology to create a lasting bond for a unique look without fading, discoloration, cracking or peeling.

We'd love to be part of your next project. To [see more photos](#) of our project or to learn how Natina can help color your project, email info@natina.com or call 1 (877) 762-8462.

Natina finish on light poles along Florida Drive.
