

**Project Name:**  
Florida Drive  
Median Barrier

**Materials applied with Natina:**  
All galvanized parts including  
guardrail, light poles and hardware

Natina finish on light poles along Florida Drive.

Natina Steel Solution applied in 2015.

# When Guardrail Complements the Roadways

Together we worked with the City of San Diego and Caltrans (California Department of Transportation) on the Florida Drive Median Barrier Project to treat the guardrails and light poles in March 2015.

Natina was specified because of its rustic brown finish. In fact, Caltrans included Natina in their original specification as part of their visual impact assessment project needs.

Natina utilizes nature's color technology to create a unique brown finish without any VOC's.

See how we can change your construction proejct.

Natina Steel Solution shown in 2019.
