

NATINA®

REACTIVE COLOR TREATMENT

Project Name:
Sunrise Powerlink
Transmission

Materials applied with Natina:
Transmission towers, galvanized cable
barrier, gates, exclusionary fence

Beautiful Rustic Brown Patina

Natina transmission tower is hidden in the background.

San Diego Gas & Electric (SDG&E) planned and constructed the Sunrise Powerlink Transmission Project to keep up with the increasing demand for energy in Southern California. Special considerations were taken to ensure successful construction of the transmission towers while minimizing visual and environmental impacts.

For a section of the project, SDG&E looked into several options to better blend the towers with the landscape, and chose Natina Steel Solution. Natina was specified for its environmentally-safe formula and rustic brown finish.

Natina Steel Solution applied in 2012.

Natina Steel Solution shown in 2018.
