

LET US  
NATURALLY  
COLOR  
YOUR WORLD

**Project Names:**  
Goldfield cell tower at Tonto National Forest (main image) Sunrise Powerlink Transmission Project with Natina on Lattice Towers (above)

Malibu Canyon Oil Pole Remediation 2

## Naturally Enhance, Blend & Beautify Transmission Structures

Natina combines the corrosive resistance of galvanized surfaces with a weathered-steel look. See how our rustic brown finish can help your next project:

- Colors zinc for a natural brown finish.
- Does not bleed, stain or discolor surfaces around structures.
- Rust protection of galvanized steel.
- Environmentally-friendly solution that is safe around wildlife and plants.
