

Project Name:
Guardrail Enhancement
for Escondido

Materials applied with Natina:
Guardrail and all components

Natina Steel Solution shown in 2019.

Natural and Distinguished Color for Steel Projects

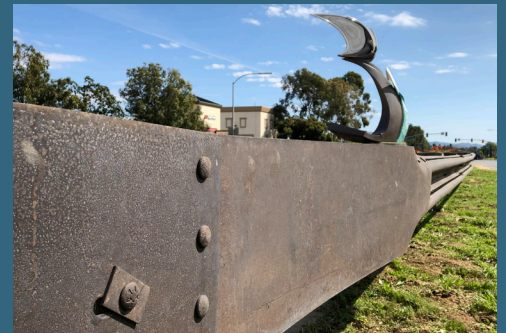

City of Escondido specified the natural patina, Natina Steel Solution to color the guardrail surrounding one of their famous art pieces. The objective was to take the shiny, galvanized guardrail and turn it into a less noticeable and natural finish. Instead of weathering steel, paint or powder coating, the city chose Natina, preferring our distinctive weathered brown patina. Providing a low maintenance color, Natina reacts with the zinc which develops into natural brown hues.

Now with Natina, Escondido residents and visitors can focus on the sculpture without any distracting glare from a shiny metal guardrails.
